SUMMARY

Data Analyst who transforms messy datasets into actionable insights that prevent costly errors and drive sustainable process improvements. Proven expertise in cleaning complex data, automating manual workflows, and building scalable analytical systems. Domains include financial operations, education analytics, workforce management, and healthcare compliance environments. Consistently delivers quantifiable business impact through data-driven optimization, combines technical skills with strategic problem-solving to reduce operational waste and improve organizational outcomes.

CORE COMPETENCIES

- Data Analysis & Predictive Modeling
- Python, SQL, R, Statistical Analysis
- Advanced Excel, Tableau
- Data Cleaning & Quality Assurance
- Process Optimization
- Dashboard Creation & KPI Tracking
- Financial Analysis & Budget Forecasting
- Accounting & Inventory Control
- Cross-Functional Collaboration
- HIPAA Compliance & Data Security
- CompTIA Security+ Certified

TECHNICAL SKILLS

Programming & Analytics: Python (Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, SciPy, Statsmodels), SQL (PostgreSQL), R, Statistical Modeling, Predictive Modeling

Visualization & Tools: Advanced Excel, Tableau, Git/GitHub, Google Workspace

Core Capabilities: Data Cleaning & Wrangling, Preprocessing, Exploratory Data Analysis, Data Quality Assurance, Feature Engineering, Dashboards, KPI Tracking

Collaboration: Cross-Functional Stakeholder Reporting, Technical Documentation, Findings Presentations

Domain Expertise: Financial Analysis, Education Analytics, Healthcare Compliance (HIPAA), Workforce Management, Fraud Detection, Budget Forecasting, Accounting, Inventory Control, Purchasing Operations

KEY ACCOMPLISHMENTS

- Built Python-based linear regression model analyzing 7,000 properties to identify undervalued real estate investments. Model identified 4,757 properties projected to yield 14.8% average ROI versus market average of 8.5% delivering 6.3 percentage point advantage for portfolio optimization.
- Optimized global commodities data processing in Excel, reducing quarterly analysis time by 90% (from 3 weeks to 2 days) through standardized automation workflows. Enabled faster strategic decision-making for international supply contracts
- Managed \$1.1M in accounts receivable; reduced delinquency by 65% to \$375K through systematic data analysis and targeted outreach (45% via financial discrepancy research, 16% via formal requests, 5% via system corrections)
- Analyzed performance data for 1,950 students over 3 years using Excel dashboards; identified early warning indicators and translated insights into curriculum improvements that increased pass rates from 75% to 87%

PROFESSIONAL EXPERIENCE

Accounts Payable Specialist | Robert Half | Sep 2024 – Dec 2024 | Cripple Creek, CO

- Cleared 5,100 backlogged invoices (340+ daily) within first 3 weeks using 2 proprietary accounting/inventory systems; eliminated \$30,000 in late fees through systematic aging report analysis and vendor payment prioritization
- Processed \$750K in weekly transactions (220 invoices, \$150K+ daily) at 100% accuracy and secured payment extensions for 20 critical vendors to improve cash flow.

HS Spanish Teacher | Sand Creek High School | Jul 2021 – May 2024 | Colorado Springs, CO

- Analyzed performance data for 1,950 students over three years, building interactive Excel dashboards that flagged early-warning indicators and enabled targeted interventions, raising Spanish 1 pass rates from 75% to 87%.
- Translated data findings into curriculum changes and presented program-evaluation results to school leadership, demonstrating clear communication of insights to non-technical stakeholders.

Team Lead Supervisor | CaptionCall by Sorenson | Nov 2014 – Jul 2021 | Colorado Springs, CO

- Built Excel-macro automation for test-call grading that cut evaluation time from 10 minutes to 90 seconds per call (85% reduction) across 65+ monthly evaluations, freeing supervisor time for coaching.
- Tracked and visualized performance metrics for 27–42 agents and developed forecasting models (historical trends, headcount, supply costs) that informed staffing and resource-allocation decisions.

Data Analyst | FSIC, Inc. | Dec 2016 – May 2018 | Colorado Springs, CO

- Cleaned, preprocessed, and analyzed 24M+ multi-vendor purchasing transactions (1M+ monthly), achieving a 100% accuracy rate on monthly reporting under strict audit requirements through systematic triple-verification.
- Surfaced multiple vendor pricing discrepancies during exploratory analysis, providing actionable insights that supported client cost-control decisions for the firm's two largest accounts.

EDUCATION

Master of Science, Data Analytics – Data Science (In Progress)

Western Governors University, Expected 2027

Relevant Coursework: Statistical Data Mining, Predictive Modeling, Analytics Programming (Python, R), Data Management (SQL)

Bachelor of Business Administration, International Business, Magna Cum Laude

University of Texas at Arlington, GPA: 3.84

Relevant Coursework: Managerial Accounting, International Finance, Financial Analysis

CERTIFICATIONS

- CompTIA Security+, Exp. Feb 2028
- CompTIA Network+, Exp. Apr 2028
- CompTIA Secure Infrastructure Specialist
- SQL Programming Basics, Udemy, May 2025
